

Website Navigation Guide

For normal users, editors, and presentation walkthroughs

Purpose

This guide explains how new users can move through the website and how editors can manage official content through the dashboard.

Use during presentation

Start with the public pages, show the account flow, then demonstrate the editor dashboard only with a approved staff account.

Best audience

Students, officers, faculty advisers, alumni contributors, and approved content editors.

WEBSITE MAP

Main Navigation

The top navigation is arranged for first-time visitors: start with public updates, then move i student services, records, transparency, and organization information.

- " Home - welcome screen, latest announcement, quick links, events, transparency snapshot, preview.
- " Announcements - official notices, reminders, and organization updates.
- " News & Gallery - full stories, photo albums, reactions, and comments.
- " Events - schedules, venues, registration links, and activity details.
- " Student Portal - academic resources, curriculum guide, and account-based shortcuts.
- " Alumni - verified graduate directory organized by batch.
- " Internal Audit - accomplishment reports, liquidation reports, resolutions, and approved rec
- " About - organization profile, officers, faculty, milestones, and contact details.
- " Account - sign in, create an account, update profile, and open the dashboard if approved a

Presentation path

Recommended flow: Home -> News & Gallery -> Student Portal -> Account -> Internal Audit -> demo for editors.

NORMAL USER GUIDE

How Students and Visitors Navigate

1

Start at Home

Use the Home page as the welcome point. It introduces ICpEP Connect and shows the most public areas at a glance.

- " Read the latest announcement card if one is available.
- " Use Quick Access for resources, curriculum, gallery, alumni, merchandise, and about links.
- " Switch light or dark mode from the moon/sun button if needed.

2

Read Announcements

Open Announcements for formal notices and reminders from the organization.

- " Click an announcement card to read the complete details.
- " Check the date and category so you know whether it is current, urgent, or informational.

3

Browse News & Gallery

Use News & Gallery for organization stories, photo collections, event highlights, and community interaction.

- " Click a news card to open the full story.
- " Use the image slider when a post has multiple photos.
- " Approved signed-in users can react and comment; guests can still read public stories.

4

Check Events

Open Events to see upcoming and published activities.

- " Review the date, venue, event status, and registration link when available.
- " Use the event details before sharing schedules with classmates.

NORMAL USER GUIDE

Accounts, Student Tools, and Records

5

Use the Student Portal

The Student Portal gathers student-facing academic tools in one place.

- " Open Resources for uploaded files, reviewers, notes, and external academic links.
- " Open the Curriculum Guide to review courses, units, and elective tracks.
- " Some resources may require an approved signed-in account.

6

Create or Open an Account

Use Account to sign in, register, and manage your public identity on the website.

- " New users register with name, student number, email, password, and year level.
- " Pending accounts can sign in but may have limited access until approved.
- " Approved users can set a nickname and upload or remove their profile photo.

7

View Alumni, Audit, and About Pages

These pages help users verify official organization information.

- " Alumni shows verified graduate profiles by batch.
- " Internal Audit shows transparency records such as accomplishment reports, liquidation resolutions.
- " About shows the organization profile, officers, faculty advisers, milestones, and contact information.

Mobile tip

On phones, tap the menu button in the header to open navigation. Long-press or hover reactions are only available where reactions are available.

EDITOR GUIDE

How Editors Access the Dashboard

1

Sign in through Account

Editors do not open the dashboard from the public navbar. Sign in first, then open Account.

- " If your profile is approved as editor or admin, the Account page shows an Open Dashboard button.
- " If the button is missing, your role or approval status must be checked by an admin.

2

Use the Dashboard Overview

The Overview gives editors a quick view of site activity and content status before editing.

- " Check analytics and activity cards first.
- " Use dashboard sections from the side or mobile tab navigation.

3

Manage Public Content

Editors should keep official pages updated through the correct dashboard module.

- " Announcements - publish official notices, summaries, full details, categories, and featured images.
- " Events - add schedules, venues, registration links, event status, and activity images.
- " News & Gallery - create full stories and upload photo albums for posts.
- " Resources - upload files or links for approved student access.
- " Alumni - maintain verified yearbook profiles and graduate details.
- " About Content - update officers, faculty, organization profile, and milestones.
- " Internal Audit - publish accomplishment reports, liquidation reports, resolutions, and approval records.

EDITOR GUIDE

Recommended Editing Workflow

4

Draft before publishing

Create content as a draft first when details still need checking.

- " Confirm spelling, dates, venue names, attachments, and public wording.
- " Use featured status only for items that should stand out on public pages.
- " For older posts, select the correct publication or event date before publishing.

5

Upload files responsibly

Uploaded files and photos should be clear, relevant, and appropriate for public viewing.

- " News posts can hold many photos, but choose only useful images and arrange them clearly.
- " Use descriptive image text when the dashboard asks for it so the site stays accessible.
- " For Internal Audit, upload the correct PDF under the right report type.

6

Use user and team tools carefully

Some dashboard tools are admin-only, but editors should understand what they do.

- " Users & Roles is for approving accounts and assigning student, editor, or admin roles.
- " Team Management helps admins assign tasks and lets staff recognize each other through photos.
- " Do not change user roles unless you are authorized to do so.

Editor safety rules

Only publish verified information. Avoid private student data, unofficial claims, unclear photos, unapproved financial documents.

Sign out on shared computers. If you are unsure about content, keep it as draft and ask an official adviser to review it first.

PRESENTATION HELPER

Simple Demo Script

Normal user walkthrough

- " Open Home and explain that ICpEP Connect is the central portal for organization updates resources.
- " Click Announcements, then open one announcement to show the full-detail view.
- " Go to News & Gallery, open a story, and show photos, reactions, and comments.
- " Open Student Portal and point out resources, curriculum, and account-based access.
- " Open Alumni and Internal Audit to show verified records and transparency pages.

Editor walkthrough

- " Sign in using an approved editor/admin account.
- " Open Account and click Open Dashboard.
- " Show the Overview, then demonstrate one content module such as Announcements or News.
- " Explain draft versus published status, featured items, photo/file upload, and the importance of verification.
- " End by showing where admins manage users, roles, and team tasks.

Closing line

For new users, the website is a guide. For editors, the dashboard is a responsibility: keep information clear, official, and useful.
